Cyber & Privacy Liability Insurance

Maximizing your knowledge of this critical insurance protection

In today's digital landscape, cyber threats are ever-present making cyber and privacy liability insurance indispensable for your clients, no matter their size or industry. Equip yourself with the knowledge to better serve your clients by joining our expert panel for an exclusive webcast exploring the basics of cyber coverage and its practical applications. This program delves into the essential aspects of coverage, such as breach response, forensic investigation costs, ransomware protection, and other insurance measures activated by security incidents or ransomware threats. The panelists also discuss strategies for effective communication with cyber insurers during incidents and how to obtain approval for expert fees and ransomware payments. Additionally, the faculty examine how cyber insurance can help defend against and resolve privacy liability claims that may arise from incidents, while highlighting key exclusions that could impact coverage. Beyond policy terms, they review the current state of the cyber insurance market and offer practical advice on building a robust cyber insurance program and avoiding common pitfalls during the application process.
